

15 petabytes

And a network that can handle it

CERN & HP ProCurve

As the principal networking provider for CERN, HP ProCurve is proud to celebrate the official LHC start-up. CERN chose HP ProCurve to build its network based on high performance, security, reliability and flexibility. ProCurve offers choice through standards-based solutions, putting your business in the optimum position for growth. Just think what ProCurve could do for your network.

Network of Choice
