Dr. Idefons Magrans de Abril receives a Thesis Award from CMS experiment

On March 16th, two PhD students and 12 industries were recognised for their outstanding contribution to the experiment at the CMS Awards Ceremony. The Thesis Awards are given to recent doctorates on the basis of their PhD thesis.

Dr. Idefons Magrans de Abril, Institute for High Energy Physics, Vienna, an openlab fellow since February 2009 working on a Siemens project, was amongst the two PhD Students awarded that day for his engineering thesis on 'The CMS Trigger

Supervisor: Control and Hardware Monitoring System of the CMS Level-1 Trigger at CERN'.

For more information about this ceremony, please refer to the article 'CMS awards outstanding contributions to experiment' by Rebecca Leam, published in the 30th March issue of CMS Times (<http://cms.web.cern.ch> => clic on 'Newsletter' and then on 'Archive').
